SORULAR 01-04

Cümlede boş bırakılan yere / yerlere uygun düşen sözcük veya ifadeyi bulunuz.

1. ---- the number of nurses assigned to the emergency unit had doubled, the average waiting time remained virtually unchanged, suggesting that staff shortages alone could not account for the delays.

A) Although
B) Once
C) So that
D) Because
E) Unless

2. The laboratory excluded several bone fragments from the dating analysis ---- even a small amount of modern carbon on their surfaces could make the specimens appear substantially younger than they actually were.

A) so that
B) because
C) even though
D) unless
E) whereas

3. The findings cannot be independently reproduced ---- the researchers make the underlying data and the full analytical procedure available; a summary of the results is insufficient for anyone attempting to repeat the study.

A) now that
B) even though
C) unless
D) whereas
E) so that

4. Shallow lakes tend to respond rapidly to changes in air temperature, ---- deeper lakes can retain heat for longer periods because a much larger volume of water must cool before their overall temperature falls.

A) because
B) whereas
C) in order that
D) as soon as
E) unless

SORULAR 05-08

5. The clinic deliberately replaced technical terms with plain language in its discharge leaflets ---- patients with limited medical knowledge could understand the instructions without asking a relative to interpret them.

A) so that
B) whereas
C) now that
D) as if
E) unless

6. No tissue samples were processed ---- the ethics committee had granted written approval; the research team began the laboratory work only after the authorisation had been formally recorded.

A) while
B) because
C) provided that
D) until
E) even if

7. Applicants may submit scanned copies of their qualifications ---- the documents are legible and accompanied by certified translations; files that fail either requirement will be returned without further assessment.

A) so that
B) unless
C) even if
D) although
E) provided that

8. The monitoring unit is designed to keep recording data ---- the main network should fail, since its sensors and local storage system operate independently of the central server.

A) whereas
B) as if
C) even if
D) now that
E) in order to

SORULAR 09-12

9. The outdoor demonstration was cancelled ---- a forecast of exceptionally strong winds; the organisers stated that the predicted conditions would make it impossible to secure the temporary structures safely.

A) despite
B) because of
C) instead of
D) regardless of
E) contrary to

10. The pumps continued to operate normally throughout the night ---- a prolonged power cut, as an independent generator supplied all the electricity required to keep the water-treatment system running.

A) instead of
B) for the purpose of
C) because of
D) as a result of
E) despite

11. The trial included no comparison group receiving standard care; ----, the researchers could not determine whether the observed improvement resulted from the new programme or from changes that would have occurred anyway.

A) instead
B) otherwise
C) however
D) therefore
E) likewise

12. The lightweight material is cheaper to manufacture than the conventional alternative; ----, its tendency to corrode in humid environments makes it more expensive to maintain over the full life of a building.

A) consequently
B) that is
C) otherwise
D) for example
E) however

SORULAR 13-16

13. The new survey drew on a more geographically diverse sample than the earlier study; ----, it followed the same participants for twice as long, providing a stronger basis for examining changes over time.

A) in contrast
B) otherwise
C) instead
D) moreover
E) however

14. Some urban birds modify their behaviour in response to artificial light; ----, individuals nesting close to illuminated streets may begin their morning calls well before birds occupying darker parts of the same neighbourhood.

A) nevertheless
B) for example
C) in contrast
D) instead
E) otherwise

15. The model's accuracy is conditional on the stability of the input data; ----, its predictions are reliable only if the variables used to generate them remain within the range for which it was originally tested.

A) for instance
B) meanwhile
C) however
D) otherwise
E) in other words

16. The adhesive must be allowed to set completely before the panel is lifted; ----, the joint may separate under the panel's weight, even when the surfaces have been correctly prepared and aligned.

A) however
B) for instance
C) nevertheless
D) likewise
E) otherwise

SORULAR 17-20

17. The review was commissioned to identify why repeated errors had occurred ---- merely to produce a numerical tally; the committee explicitly rejected a report consisting of totals without any explanation of their causes.

A) rather than
B) despite
C) in case of
D) because of
E) due to

18. The digital collection contains recordings of the interviews ---- written transcripts of every session; both forms of documentation can be consulted by researchers who wish to compare spoken accounts with the edited text.

A) in place of
B) in addition to
C) as opposed to
D) instead of
E) owing to

19. ---- its predecessor, which required every update to be entered manually, the new monitoring system imports revised figures automatically and flags any inconsistencies before the data are displayed to users.

A) Because
B) Although
C) So that
D) Unlike
E) Whenever

20. The same confidentiality rules apply to all staff ---- their seniority or contractual status; neither long service nor a temporary appointment exempts an employee from the obligation to protect sensitive information.

A) as a result of
B) in place of
C) regardless of
D) for the purpose of
E) contrary to

SORULAR 21-24

21. The exhibition's audio descriptions were prepared in several languages ---- visitors who could not read the printed labels would still be able to follow the argument developed across the different sections of the gallery.

A) whereas
B) as if
C) although
D) in order that
E) unless

22. The archivists retained encrypted copies on a separate server ---- the original files should become inaccessible during the migration; the copies were intended as a precaution, not as a replacement for the main collection.

A) only if
B) in case
C) even though
D) whereas
E) provided that

23. The calibration remains valid ---- the sensors operate within the specified temperature range; readings obtained outside that interval must be checked against an independent reference before they are used in the analysis.

A) as though
B) whereas
C) as long as
D) so that
E) even though

24. Access to the restricted database will be granted ---- the applicant's identity has been independently verified; signing the consent form alone does not satisfy the security requirements, even for previously registered users.

A) as though
B) only if
C) even though
D) unless
E) so that

SORULAR 25-28

25. ---- the instrument had passed every routine inspection earlier that week, three consecutive measurements were later found to exceed the permitted error margin, prompting an immediate review of the testing procedure.

A) As if
B) Even though
C) Unless
D) So that
E) Provided that

26. The wearable sensor records changes in movement as they occur, ---- the questionnaire relies on participants' memories of activities performed during the previous week, making the two methods vulnerable to different types of error.

A) so that
B) before
C) until
D) while
E) provided that

27. ---- the first response team reached the village, local volunteers had already moved the most vulnerable residents to higher ground, so the rescuers could concentrate on checking isolated houses rather than organising a mass evacuation.

A) as long as
B) in that
C) By the time
D) so that
E) unless

28. ---- the preliminary design had been formally accepted, the engineers proceeded to detailed testing; under the project rules, no such work could begin without that initial authorisation.

A) Once
B) unless
C) even if
D) so that
E) although

SORULAR 29-32

29. The safety valve closes ---- pressure exceeds the specified limit; the response is automatic and occurs without any delay, preventing additional gas from entering the damaged section of the pipeline.

A) although
B) even if
C) until
D) so that
E) as soon as

30. Brief electrical surges can occur ---- a high-powered machine is switched off, and the monitoring records show that the disturbances coincide precisely with the moment the current to that machine is interrupted.

A) although
B) unless
C) in order that
D) when
E) whereas

31. ---- the external reviewers had checked the raw measurements did the agency release its preliminary findings, even though the analysis itself had been completed several weeks earlier.

A) As long as
B) Because
C) Not until
D) Even though
E) Whereas

32. The team had ---- submitted its final report ---- a second set of measurements revealed a discrepancy that required several of its conclusions to be reconsidered.

A) no sooner / than
B) both / and
C) whether / or
D) such / that
E) either / or

SORULAR 33-36

33. The new drug-delivery device was ---- powered by batteries ---- connected to the mains; instead, a small chemical reaction generated the energy needed to release each measured dose.

A) whether / or
B) either / or
C) not only / but also
D) both / and
E) neither / nor

34. The revised surface treatment ---- reduced friction between moving parts ---- improved their resistance to wear, producing two distinct benefits under the same operating conditions.

A) not only / but also
B) neither / nor
C) the more / the less
D) so / that
E) whether / or

35. It remains unclear ---- the abrupt decline in output resulted from an error in the control software ---- from a mechanical fault; the available records do not allow either explanation to be ruled out.

A) both / and
B) neither / nor
C) whether / or
D) not only / but also
E) either / or

36. ---- frequently the researchers altered the sampling procedure during the trial, ---- accurately they could compare the final results with those obtained at the outset, since consistency between measurements was progressively lost.

A) not only / but also
B) so / that
C) neither / nor
D) as / as
E) The more / the less

SORULAR 37-40

37. The restoration required ---- a high level of technical expertise ---- only specialists with extensive experience of the original materials were permitted to work directly on the damaged panels.

A) whether / or
B) either / or
C) as / as
D) such / that
E) so / that

38. The soil around the abandoned storage site was ---- severely contaminated ---- the local authority prohibited food production there until an independent assessment could establish whether cultivation would be safe.

A) so / that
B) whether / or
C) such / that
D) as / as
E) neither / nor

39. The revised index differs from the earlier measure ---- it takes account of how income is distributed within households, rather than treating every household member as if they had equal access to resources.

A) so that
B) even though
C) in that
D) unless
E) as soon as

40. ---- the previously restricted records have been released, historians can examine the negotiations in far greater detail; they no longer have to rely exclusively on the selective accounts published by those who took part.

A) Now that
B) So that
C) Although
D) As if
E) Unless
